

31.10.2023 nr 2023-10-21

To whom it may concern,

With this letter, we aim to express our support for the application BECOME for the Life Energy Community Facility. The team has been in touch with us and explained their approach, which we consider convincing and of which we expect the impact will be substantial.

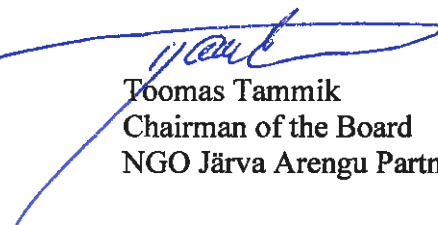

We understand that we could be asked to:

1. Spread the call for applications;
2. Participate in workshops at the level of our Member State to discuss aspects of successful energy communities;
3. Join working sessions supporting emerging and growing energy communities in your area of operation;
4. Spread best practices and relevant news.

We are further invited to the diverse capacity-building activities that will be scheduled in our Member State, and could be hosting or participating in a Peer to Peer exchange.

We look forward to collaborating with the BECOME team.

Kind regards,

Toomas Tammik
Chairman of the Board
